Date: May 6, 2013

Dear Rainey Creek Project Participants,

You are invited on a field trip of the Rainey Creek Vegetation Restoration Project area scheduled for Tuesday, May 21 leaving from the Swan Valley American Legion Hall (157 Stoltenberg Ln) at 9:00 am and returning by 2:00pm. This will be the third of four meetings to collaboratively develop proposed treatments to address vegetation health issues in the Rainey Creek drainage. On the field trip we plan to visit sites of interest and discuss potential treatment options.

Participants should bring a lunch and appropriate attire for the weather and transportation. We can carpool from the Legion Hall.

Since our last meeting we have updated our Caribou-Targhee National Forest website which now contains information relevant to the Rainey Creek project, including powerpoint presentations, project maps and meeting notes from the March 27 and April 30, 2013 meetings. The following link will take you to our forest website where you can access this information.

<http://www.fs.usda.gov/detail/ctnf/home/?cid=stelprdb5416936>

Thanks to those of you who participated in one or both of our previous collaborative meetings, we appreciate your involvement. This field trip is open to anyone to attend, regardless of attendance at a previous meeting so please invite anyone you think would be interested.

Questions about the meeting can be addressed to Deb Flowers at 208-354-6630, dmflowers@fs.fed.us or myself at 208-523-1412, thollingshead@fs.fed.us.

Sincerely,

TRACY HOLLINGSHEAD
Palisades District Ranger
